POLICE: CRIME PREVENTION

Prevention First aims to prevent crime before it happens, ultimately making Auckland city centre a safer and better place to live, work and visit. This includes StoreWatch and providing advice to businesses on how to prevent crime, retail theft and increase safety. Their active policing includes on-street presence in the city centre. They also work alongside the CityWatch team to support a safe city centre.

Heart of the City can facilitate safety specific enquiries from businesses.

STOREWATCH

StoreWatch, a communication network of 150+ businesses and the NZ Police, aims to reduce and prevent retail theft in the city centre. The network shares critical information, including suspicious behaviour and shoplifting incidents. This information helps police make arrests and grows awareness and a sense of community between participating businesses.

TRESPASS

Businesses can verbally trespass or issue a written trespass notice to anyone who is not wanted in their store. CCTV images or mobile pictures of the person including date, time and reason for trespass is useful as it can be used as evidence.
